TECTONOPHYSICS

Contents Volume 262

Special section: Kimberlites and Structure of Cratonic Lithosphere
(edited by S. Sobolev and K. Fuchs)

Preface 1
4-D Lithosphere Mapping: methodology and examples
S.Y. O'Reilly and W.L. Griffin 3
Thermal state and composition of the lithospheric mantle beneath the Daldyn kimberlite field, Yakutia
W.L. Griffin, F.V. Kaminsky, C.G. Ryan, S.Y. O'Reilly, T.T. Win and I.P. Ilupin 19
Seismic studies on the Trans-Hudson Orogen of western Canada
R.M. Ellis, Z. Hajnal and M.G. Bostock 35
High velocities in the uppermost mantle of the Siberian craton
N.I. Pavlenkova, G.A. Pavlenkova and L.N. Solodilov 51
Deep seismic structure of the Kaapvaal craton
L.P. Vinnik, R.W.E. Green, L.O. Nicolaysen, G.L. Kosarev and N.V. Petersen 67

Research Papers
Seismotectonics and seismic hazard modelling for Southern Bulgaria
T. van Eck and T. Stoyanov 77
The East Carpathians: Indications of phase transitions, lithospheric failure and decoupled evolution of thrust belt and its foreland
E.V. Artyushkov, M.A. Baer and N.-A. Mörner 101
An integrated study to recent tectonics in Central Japan: seismological, geodetic, morphotectonic and structural data compared
R. Caputo and H. Sato 133
Parametric time series analysis of extreme events in earthquake electrical precursors
V. Cuomo, G. Di Bello, V. Lapenna, M. Macchiato and C. Serio 159
Reflectivity characteristics of the crust from modelling refraction/wide-angle and normal-incidence reflection data on BABEL Line 1
M. Ali Riahi and C. Juhlin 173
Three-dimensional geometry of kink bands in slates and its relationship with finite strain
D.L. Kirschner and A. Teixell 195
Palaeostress and geotectonic interpretation of the Alpine Cycle onset in the Sierra del Guadarrama (eastern Iberian Central System), based on evidence from episyenites
J.M. González-Casado, J.M. Caballero, C. Casquet, C. Galindo and F. Tornos 213
Active intraplate deformation in south India
K.R. Subrahmanya 231
Varying mantle sources of supra-subduction zone ophiolites: REE evidence from the Zambales Ophiolite Complex, Luzon, Philippines
G.P. Yumul 243
Formation of magmatic crust at the Andean continental margin during early Mesozoic: a geological and thermal model of the North Chilean Coast Range
F. Lucassen, C.M.R. Fowler and G. Franz 263
In-situ stress measurement in an earthquake focal area
H. Tsukahara, R. Ikeda and K. Omura 281
Magnetic modelling as a tool in the evaluation of impact structures, with special reference to the Tvären Bay impact crater, SE Sweden
J. Ormö and G. Blomqvist . . . . .

291
Paleomagnetism of late Mesozoic rocks from northeastern China: the role of the Tan–Lu fault in the North China Block
H. Uchimura, M. Kono, H. Tsunakawa, G. Kimura, Q. Wei, T. Hao and H. Liu 301
Fluid pressure and salinity variations in shear zone-related veins, central Pyrenees, France: Implications for the fault-valve model
I.H.C. Henderson and A.M. McCaig 321
Shear zone-controlled magma emplacement or magma-assisted nucleation of shear zones? Insights from northeast Brazil
S.P. Neves, A. Vauchez and C.J. Archanjo 349
